

Ceiling Canopy With Lighting

Ladder Rack

The **CARGOGLIDE WALLSLIDE** system has several options designed to improve safety, efficiency and productivity on your jobsite. A powder coated steel framework supports the sliding walls made from a solid sheet of 1/8 inch aluminum that your customized shelving will attach to. The supporting rail structure is made from high strength 6061-T6 hardened aircraft grade aluminum alloy and slides on industrial cam follower needle bearings. Remote controlled motor options drive to open and close the walls. The optional Ceiling and Wall Canopy will keep your cargo safe from inclement weather.
